

Conant Gardens

D.F.A.[Death From Above]. One of Detroit's east side's underground unsigned rap group. Together forming one of the most talented and lyrical genius's reppin' da "D", residing in the Conant Gaurdens. We have not performed in a while, do to having to have had sold our protools studio, money was really too tight to hit a real studio. So we did what we could, rapped over industry beats and made a couple of beats of our own. These tracks are not complete, they are not mixed or mastered in any way. We were basically better at rapping and laying tracks, not too familiar with the mixing and mastering software. So this is how it turned out. We decided to put these songs on here (though the last recording was like over 4 yaers ago) instead of just letting them sit in our ipods and on our cd's. We decided to let the world hear and feel.
